

Walking - Pole 2500 - 1 Head - A 250h

Carlotta de Bevilacqua

DESCRIPTION

Walking is a family of outdoor appliances that design dynamic lighting landscapes with a new and different approach focused on human perception for visual and psychological details. It can create different luminous landscapes starting from three white or coloured lighting performances, either single or combined within the same element according to a space gradient of structures of different heights.

It defines a new, exciting lighting language, respectful of the surrounding space, which it approaches with deeds that promote its perception and a man-sized experience. A dynamic discovery of space that is allowed, among other things, by the possible interaction with sensors, the Artemide App and advanced intelligences.

CE

Notes

Compatibility with Artemide App on request

FEATURES

- Product Code: **T4507A30**
- Colour: **Black**
- Installation: **Floor, Pole**
- Material: **Aluminium**
- Series: **Architectural Outdoor**
- Environment: **Outdoor**
- design by: **Carlotta de Bevilacqua**

DIMENSIONS

- Height: **2500 mm**
