ACT

The Act Lamp transforms industrial waste into striking pendant designs crafted from discarded PE water pipe scraps – materials traditionally incinerated due to their complex composition. Embracing circular design and resourceful innovation, each lamp is a one-of-a-kind piece. While sharing a cohesive form, no two lamps have the same ring arrangement, creating a distinctive play of light and shadow in every design.

Amp Lamp Large and Small in Matt/White

Designed for Normann Copenhagen by Danish designer Simon Legald, the Amp Lamp collection includes pendants, table lamps and wall lamps.

The pendant lamps, with their nostalgic yet contemporary feel, have become modern classics in Normann Copenhagen's range, suitable for a variety of settings and scenarios. The idea for the lamp's shape originated when the designer was restoring an old 1960s radio at home. While searching for spare parts, he was captivated by the glow from the tube amplifier. The simple oval shape and glow of the bulb reference this, and the name "Amp" refers to the English term "tube amplifier."

Using durable and aesthetically pleasing materials, the design combines a glass lampshade with a visually appealing socket crafted from marble, brass, or zinc. The bulb, which inspired the design, emits a charismatic glow through the glass lampshade, available in various finishes. The collection offers gold-tinted, black-tinted, or white lampshades that complement the base in black, green, or white marble, brushed zinc, or shiny brass.

A desire to reuse and rethink by-products from the production of the Amp Lamp collection led to the introduction of the Amp Lamp Matt. During the meticulous spray-painting process for tinting the glass lampshades, slight unevenness in the paint can occur. To repurpose this production waste, these imperfect lampshades are glass-blown, transforming the glass and diminishing any irregularities. The result is a beautiful matt surface with a distinctive white opal-like color. These lampshades are paired with a utilitarian zinc socket, offering a new take on the original marble and glass combination.

Designed for use in most spaces where extra light is needed, and available in two sizes, the Amp pendants emit a cozy, pleasant glow when hung alone or in clusters, providing a contemporary lighting solution for living rooms, kitchens, restaurants and hallways.

BELL

The expression is robust, the form is simple. Designed in 2012 by Danish design duo Andreas Lund and Jacob Rudbeck for Normann Copenhagen, Bell is a ceiling lamp in an iconic bell shape and with special attention paid to its details. Rather than being hidden, the meeting between the lead and the lamp is accentuated in a modern and original way.

Bubba Lamp Ø25

BUBBA

Bubba is a collection of characterful lighting designs inspired by the multifaceted clusters formed by floating soap bubbles. The unusual shape elevates standard glass lampshades into an intricate and eye-catching design. Designed for numerous uses and settings, the collection offers pendant lights in two sizes alongside two wall and ceiling lamps, all with a sophisticated, elegant aesthetic that effortlessly complements any room.

Dim Linear Lamp in Brushed Aluminum

DIM

Dim Linear Lamp is designed by the multi-disciplinary design agency R S W. Drawing inspiration from the evolving role of dining tables in contemporary living spaces, R S W developed a concept that offers versatile lighting options in contemporary homes, with a pendant lamp that offers adaptability and functionality. Integrated LED technology enables adjustments in brightness and color temperature, offering both focused and ambient lighting.

Hat Lamp Medium in Black

Hat Lamp Linear in Black

HAT

Hat is named after its recognizable silhouette. The collection includes both pendants and linear lamps in various sizes. Common for both variants is the distinctive conical shape of the lampshades, which emit a generous beam of direct light downwards from each lamp. The design is simplistic and clean, providing an intuitive indication of how the light is emitted. A column of light extends from the lampshades, showcasing the design process where functionality has paved the way for the design idiom.

NORM

Characterized by their timeless, sculptural expression, Norm presents a series of self-assembly lamps in line with Danish design traditions. Spanning decades, the lamps are named after the year of their design: Norm 69 was the first, followed by Norm 03, Norm 06, and Norm 12. Designed by Danish designer Simon Karkov in 1969, the first lamp, Norm 69, was introduced as the inaugural product under the Normann Copenhagen brand in 2002, quickly becoming a global design icon.

PHANTOM

Phantom is a series of voluminous lamps made from a special semi-transparent resin material. The outlines of archetypical chandeliers have served as inspiration for the lamps' dramatic silhouettes, which in the ivory veil achieve a soft, iconic character. Tightly wrapped, the lamp's outline stands out like a mysterious echo of the original shape. The lamps emit an indirect, diffuse light that creates warm and atmospheric illumination.

Pix Lamp Ø20, Ø30, Ø45 and Ø60

Pix Lamp Ø45

The Pix Lamp collection is distinguished by its timeless silhouette and innovative use of materials. Available in a variety of options that include a series of pendant lamps and several wall and ceiling designs, the collection embodies a classic design ethos crafted using a forward-thinking and resourceful production technique.

The lampshades are made using 90% recycled plastic waste, where fragments are mixed, granulated, and molded into various shades of white. This unique manufacturing process involves heating the granulated plastic waste to an exact 120°C melting point and molding it using a rotational molding technique.

A method that allows the material to be repeatedly reused and reheated without compromising its structural integrity or aesthetic qualities. This ensures that each Pix Lamp can be repurposed after many years of good use, enabling a circular life cycle.

Designed with minimalism in mind, the Pix Lamp collection seamlessly adapts to a diversity of settings. It is equally at home above kitchen counters, dining tables, or in living room corners as it is in sophisticated hallways, restaurants, hotel lobbies, and department stores. Its charismatic glow and distinctive presence effortlessly complement any interior style, adding a cozy yet stylish touch to its surroundings. When unlit, the Pix Lamp's material thickness lends it an opaque appearance, evoking a subtle elegance. Once illuminated, the lamp transforms into a mesmerizing, translucent orb reminiscent of a full moon silhouette. The light radiates through the granulated structure of the lampshade, casting enchanting patterns and creating a warm, inviting ambiance.

In summary, the Pix Lamp designed by Simon Legald for Normann Copenhagen exemplifies the union of Scandinavian design excellence and innovative design solutions in contemporary lighting. With its blend of recycled materials, advanced manufacturing techniques, and timeless aesthetics, Pix Lamp offers a captivating, resourceful design that effortlessly integrates into any space.

PIX

A desire to create an inherently classic lamp using an innovative, circular material composition, has resulted in the Pix Lamp. Available in both pendant, wall and ceiling variants, the collection spans wide, offering versatility alongside aesthetic elegance. The ceiling and wall versions feature a canopy made of silver-painted steel, facilitating effortless installation on both wall and ceiling surfaces. The lamps can be conveniently connected directly to a power outlet or via a power cord through a discreet hole on the side of the canopy.

PHANTOM

Standing tall with an architectural poise, the Phantom Floor Lamp brings a luminous statement to any space. A key feature of the lamp is its integrated LED pipe, which extends from top to bottom, ensuring an even, ambient glow throughout the entire lamp. The lamp is equipped with a foot dimmer switch, allowing for easy light adjustment: a single press turns the lamp on or off, while a long press enables stepless dimming to set the perfect ambiance. The result is a warm and inviting illumination, ideal for creating a cozy atmosphere.
