

Nimbus

Endless collection

Iris Cristal

We offer a unique lighting design experience via our Endless Collections Catalogue, where creators are invited to collaborate with us. Forget standardised solutions; our customization process enables you to manipulate and reimagine our lighting elements, ensuring your final design is as distinctive as your individual style. Explore our extensive portfolio for a spark of inspiration, and together, we'll transform your vision into a captivating reality.

Endless Collection

At Iris Cristal, we elevate illumination to an extraordinary sensory encounter. Through our Endless Collections, we redefine luxury with boundless customisation, guaranteeing each piece is as distinctive as its proprietor.

We master the time-honoured artistry of Bohemian crystal, seamlessly blending it with state-of-the-art innovation to produce designs that transcend mere aesthetics—they encapsulate emotions and reimagine opulence.

Every creation within the Endless Collections offers infinite permutations, from dimensions and configurations to finishes and lighting methodologies, all meticulously fashioned to realise any design vision.

Nimbus

design

Nimbus embodies the pursuit of the intangible, capturing the ephemeral essence of clouds suspended in stillness. Inspired by their weightless drift and ever-changing form, this piece channels the quiet power of atmosphere, where light becomes mist and presence a whisper.

More than a fixture, Nimbus is a meditation on fluidity. Its composition invites openness, movement, and transformation, a constellation of elements that hover, shift, and respond to their surroundings. Every contour is sculpted to dissolve boundaries between object and space, between function and emotion.

Like a sky in perpetual motion, Nimbus resists definition. It does not command attention; it invites reflection. A luminous breath, suspended in perfect balance.

Nimbus A01

Dimensions: 143H x 200W x 400L cm
Colours: honey, smoke green and frosted white
Components: 132 pieces

Composition

Flexible design

Our adaptable design ethos fosters boundless creativity, offering a wealth of compositions utilising the same exquisite elements. By reconfiguring our meticulously crafted components, a singular design can be metamorphosed into a diverse array of unique chandeliers. This versatility ensures that every space can be enriched with a lighting arrangement that harmonises seamlessly with its architecture and aesthetic vision. Be it grand and expansive or delicate and intimate, the potential is as limitless as one's imagination.

Collaborative

At Iris Cristal Bohemia, we are committed to realising our clients' visions. Whether choosing from our established compositions or commissioning a fully bespoke chandelier, we engage in close collaboration to refine every nuance. Share your spatial context and creative inspiration with us, and our design team will produce meticulous sketches and 3D visualisations, guaranteeing your vision culminates in an exclusive, custom-crafted lighting masterpiece.

Composition ideas

Explore our curated compositions and witness how our designs elevate spaces with sophistication and distinctiveness. Each configuration is meticulously considered harmonizing with its environment, empowering you to visualize the chandelier within diverse settings.

Technical features

Each Nimbus composition is securely affixed to the ceiling, ensuring unwavering stability and structural integrity. A secondary fixation point reinforces the composition, preserving impeccable balance and enduring durability. The elements are suspended by an ultra-fine 0.6 mm steel cable, selected for its tensile strength and near invisibility. This delicate yet robust structure enhances the organic flow of the design, allowing the piece to emanate uninterrupted elegance.

Lighting effects

External light

Illumination is a versatile art form, adaptable to any environment. Each external luminaire is compatible with a variety of lamp types, facilitating the creation of both aesthetic and functional lighting effects.

Furthermore, an extensive range of colour temperatures offers complete customisation, enabling the creation of warm, neutral, or cool ambiances to suit any setting.

Nimbus A04

Dimensions: 700H x 280Ø cm
Colours: Fume and frosted white
Components: 114 pieces

Ceiling fixing Without frame

Each Nimbus piece is conceived for seamless integration, with the option to affix it directly to the ceiling for a secure and refined installation.

This method of affixation enhances stability whilst preserving the purity of form, allowing the piece to appear effortlessly suspended within the space. The structure ensures a flawless equilibrium between aesthetics and functionality, offering a discreet yet striking presence in any environment.

Ceiling fixing With frame

The colour of the ceiling frame can be matched to the ceiling, or rendered in white or black, expanding the configuration options and ensuring each combination is unique.

Utilising a mounting frame provides a more pronounced visual presence within the space. Prior to installation, the client must prepare the ceiling, ensure connection to the electrical supply, and, if desired, create an aperture in the false ceiling to facilitate perfect alignment of the frame. This type of mounting can include lights incorporated in the ceiling plate, lights inside the hanging pieces, or a combination of both.
