WOOD FRAME MIRRORS

TECHNICAL INFO

Each mirror in this collection is a truly unique, handcrafted item. Any irregularities in the applied colour or manual lacquering, as well as any small cracks in the solid wood, are therefore not to be considered defects, but proof of the authenticity and uniqueness of each product.

Ogni specchio di questa collezione è un pezzo unico realizzato artigianalmente. Le irregolarità nelle stesura del colore o nella patinatura manuale così come eventuali micro-fessurazioni del legno massello non sono pertanto da considerarsi difetti, ma la prova dell'autenticità e dell'unicità di ciascun prodotto

Jeder Spiegel dieser Kollektion ist ein echtes, handgefertigtes Unikat. Unregelmässigkeiten im Farbauftrag oder in der manuellen Patinierung sowie eventuelle Mikrorisse im Massivholz sind daher nicht als Mängel zu betrachten, sondern als Beweis für die Echtheit und Einzigartigkeit jedes Produkts.

Chaque miroir de cette collection est une véritable pièce unique, réalisée à la main. Toute irrégularité dans l'application de la couleur ou dans la patine manuelle ainsi que toute microfissure dans le bois massif ne doivent donc pas être considérées comme des défauts, mais comme une preuve de l'authenticité et de l'unicité de chaque produit.

Cada espejo de esta colección es una pieza realmente única, fabricada a mano. Las irregularidades en la aplicación del color o la pátina manual, así como las posibles microfisuras de la madera maciza, no deben considerarse defectos, sino pruebas de la autenticidad y singularidad de cada producto.

Каждое зеркало из этой коллекции представляет собой самое настоящее штучное творение ручной работы. По этой причине неоднородный слой краски или патинирующего состава, наносимых вручную, а также микротрещины на поверхности массива должны считаться не дефектами, а признаками аутентичности и неповторимости каждого изделия.

WALLPAPER COLLECTION

Wallpaper Collection is a high-quality, big-impact collection of wallpapers designed by Francesca Greco, Marcel Wanders, Vito Nesta, and by the Devon&Devon Style Office.

100% Made in Italy, they are nickel-free, non-absorbent, odourless, washable, fire-resistant, easy to glue and remove, and do not deform during application.

All the patterns are available on either a vinyl or fibreglass backing and are printed using water-based inks with high colour stability, resistant to UV rays.

Wallpaper Collection è una collezione di carte da parati di alta qualità e di grande impatto scenografico, disegnate da Francesca Greco, Marcel Wanders, Vito Nesta e dall'Ufficio Stile di Devon&Devon.

100% made in Italy, sono prive di nickel, inassorbenti, inodori, lavabili, ignifughe, facili da incollare e da rimuovere e non si deformano durante l'applicazione.

Tutti i motivi sono disponibili sia su supporto vinilico che in fibra di vetro e sono stampati con inchiostri a base di acqua dall'elevata stabilità cromatica, resistenti ai raggi UV.

HANGING INSTRUCTIONS

СХЕМА РАСКЛАДКИ

To ensure perfect application, Devon&Devon provides a free service with made-to-measure hanging instructions. To receive yours, you need to send our design team accurate measurements of your walls, clearly indicating any doors, windows or niches. Should you be papering consecutive walls, please also provide a floor plan.

To make the hanging instructions easier, the individual modules will be supplied numbered. Devon&Devon wallpaper is cut using advanced systems that ensure perfect matching during hanging. The extra cm on each roll is indispensable for compensating for any out of square measurements.

Rolls with customised measurements can be supplied on request, as can enlarged (by up to 10%) or reduced sized patterns.

Small differences in colour due to the humidity in the printing rooms or the slight difference of dyes on neutral backings from different production batches should be considered inevitable. Devon&Devon recommends having wallpaper hung by qualified specialists.

Glue not included. For vinyl wallpapers, we recommend using OVALIT-METYLAN or similar glue. For fibreglass wallpapers, we recommend using ULTRABOND ECO DECOR WET - MAPEI or similar glue and MAPECOAT DECOR PROTECTION – MAPEI or similar protective matt finish.

Per assicurare un'applicazione perfetta, Devon&Devon mette a disposizione un servizio gratuito di definizione del piano di posa su misura. Per riceverlo, è necessario fornire al team di progettazione un rilievo accurato delle dimensioni delle pareti e indicare chiaramente l'eventuale presenza di porte, finestre o nicchie. In caso di applicazione su più pareti consecutive, si raccomanda di fornire anche una planimetria.

Per facilitare la comprensione delle indicazioni di posa, i singoli moduli vengono forniti numerati. Le carte da parati Devon&Devon vengono tagliate utilizzando sistemi avanzati di taglio che assicurano la perfetta combaciabilità durante la posa. L'abbondanza su ciascun rotolo di carta da parati è indispensabile per compensare eventuali fuori squadra.

Su richiesta, è possibile realizzare rotoli di misure customizzate oppure ingrandire (fino a + 10%) o ridurre la dimensione dei motivi grafici.

Piccole differenze di colore dovute alle condizioni igrometriche dei luoghi di stampa o alla lieve differenza di pigmentazione dei supporti neutri appartenenti a diversi lotti di produzione sono da considerarsi inevitabili. Devon&Devon raccomanda di far eseguire la posa esclusivamente a personale qualificato e specializzato.

Collante non incluso nella fornitura. Per le carte su base vinilica si consiglia di utilizzare il collante OVALIT – METYLAN o simile. Per le carte in fibra di vetro si consiglia di utilizzare il collante ULTRABOND ECO DECOR WET – MAPEI o simile ed il protettivo MAPECOAT DECOR PROTECTION –MAPEI o simile.

Um eine perfekte Anwendung zu garantieren, stellt Devon&Devon einen kostenlosen Service zur Erstellung eines maßgeschneiderten Verlegeplans zur Verfügung. Um diesen zu erhalten, ist es erforderlich, dem Planungsteam die genau erhobenen Maße der Wandflächen zu übermitteln und eventuell vorhandene Türen, Fenster oder Nischen deutlich zu kennzeichnen.

Bei Anwendung an mehreren zusammenhängenden Wänden wird empfohlen, auch einen Grundriss zu liefern. Zur Erleichterung des Verständnisses der Verlegeanleitung werden die einzelnen Module nummeriert geliefert. Die Tapeten Devon&Devon werden mit fortschrittlichen Systemen zugeschnitten, die bei der Verlegung eine perfekte Passgenauigkeit gewährleisten. Die Zugabe zu jeder Tapetenrolle ist erforderlich, um eventuelle Abweichungen der Maße auszugleichen.

Auf Anfrage können die Rollen mit individuellen Maßen gefertigt und die grafischen Motive (bis zu +10 %) vergrößert oder verkleinert werden. Geringfügige Farbabweichungen, die auf unterschiedliche hygrometrische Bedingungen am Druckort oder auf leichte Unterschiede in der Pigmentierung der Trägermaterialien aus verschiedenen Produktionschargen zurückzuführen sind, sind als unvermeidlich zu betrachten. Devon&Devon empfiehlt, die Verlegearbeiten ausschließlich von qualifiziertem Fachpersonal durchführen zu lassen.

Der Klebstoff ist nicht im Lieferumfang enthalten. Für Tapeten auf Vinylbasis wird die Verwendung des Klebstoffs OVALIT – METYLAN oder ähnlicher Produkte empfohlen. Für Glasfasertapeten ist die Verwendung von ULTRABOND ECO DECOR WET – MAPEI oder ähnlichen Produkten sowie der Schutzbeschichtung MAPECOAT DECOR PROTECTION – MAPEI o. ä. empfehlenswert.

Pour garantir une application parfaite, Devon&Devon propose un service gratuit de définition du plan de pose sur mesure. Pour en bénéficier, nous vous invitons à fournir à l'équipe de conception les cotes précises des murs et à indiquer clairement l'éventuelle présence de portes, de fenêtres ou de niches. En cas de pose sur plusieurs murs consécutifs, nous vous conseillons également de fournir une vue en plan. Afin de faciliter la compréhension des indications de pose, chaque module fourni est numéroté.

Les papiers peints Devon&Devon sont découpés à l'aide de systèmes de découpe haute précision assurant une jonction parfaite lors de la pose. Le surplus sur chaque rouleau de papier peint est indispensable pour compenser toute irrégularité d'équerrage.

Possibilité de réaliser, sur demande, des rouleaux aux dimensions personnalisées ou bien d'agrandir (jusqu'à +10 %) ou de réduire la dimension des motifs graphiques. De légères différences de couleurs dues aux conditions hydrométriques des ateliers d'impression ou à une légère différence de pigmentation des supports neutres issus de différents lots de production sont à considérer comme inévitables. Devon&Devon conseille de faire exclusivement appel à du personnel qualifié et spécialisé pour exécuter la pose.

Colle non incluse. Pour les papiers peints sur base en vinyle, il est conseillé d'utiliser la colle OVALIT – METYLAN ou un produit similaire. Pour les papiers en fibre de verre, il est conseillé d'utiliser la colle ULTRABOND ECO DECOR WET – MAPEI ou un produit similaire et le vernis de protection MAPECOAT DECOR PROTECTION –MAPEI ou un produit similaire.

Para garantizar una aplicación perfecta, Devon&Devon ofrece un servicio gratuito de definición del plano de colocación a medida. Para recibirlo, es necesario facilitar al equipo de diseño una medición precisa de las dimensiones de las paredes e indicar claramente si hay puertas, ventanas o nichos. En caso de que se aplique en varias paredes consecutivas, se recomienda adjuntar también un plano. Para facilitar la comprensión de las instrucciones de instalación, los módulos se suministran numerados.

Los papeles pintados Devon&Devon se cortan utilizando sistemas avanzados de corte que garantizan un encaje perfecto durante la colocación. Es imprescindible que cada rollo de papel pintado tenga un margen suficiente para compensar posibles desviaciones.

Si lo solicita, podemos fabricar rollos con medidas personalizadas o ampliar (hasta un 10%) o reducir el tamaño de los motivos gráficos. Es inevitable la presencia de pequeñas diferencias de color debidas a las condiciones higrométricas de los lugares de impresión o a la ligera diferencia de pigmentación de los soportes neutros pertenecientes a distintos lotes de producción. Devon&Devon recomienda que la instalación la realice exclusivamente personal cualificado y especializado.

El adhesivo no está incluido en el suministro. Para los papeles con base de vinilo, se recomienda utilizar el adhesivo OVALIT – METYLAN o similar. Para los papeles de fibra de vidrio, se recomienda utilizar el adhesivo ULTRABOND ECO DECOR WET – MAPEI o similar, y el protector MAPECOAT DECOR PROTECTION – MAPEI o similar.

Для идеального результата Devon&Devon предоставляет бесплатную услугу по разработке индивидуального плана поклейки обоев. Для ее получения необходимо предоставить проектной команде точные обмеры стен и четко указать наличие дверей, окон и ниш. В случае поклейки на несколько смежных стен необходимо также предоставить план помещения. Для облегчения понимания схемы поклейки модули поставляются пронумерованными.

Обои Devon&Devon нарезаются с использованием передовых технологий резки, обеспечивающих идеальное совмещение при наклеивании. Запас по длине на каждом рулоне обоев необходим для компенсации возможных отклонений геометрии стен.

По запросу возможно изготовление рулонов нестандартных размеров, а также увеличение (до +10%) или уменьшение масштаба рисунка. Незначительные различия в цвете, обусловленные условиями влажности в местах печати или небольшими отличиями в пигментации нейтральных основ, относящихся к разным производственным партиям, следует считать неизбежными. Devon&Devon рекомендует поручать поклейку исключительно квалифицированным специалистам.

Клей не входит в комплект поставки. Для обоев на виниловой основе рекомендуется использовать клей OVALIT – METYLAN или аналогичный. Для обоев из стекловолокна рекомендуется использовать клей ULTRABOND ECO DECOR WET – MAPEI или аналогичный, а также защитное покрытие MAPECOAT DECOR PROTECTION – MAPEI или аналогичное.
