Una storia di eccellenza e tradizione familiare

Pimar rappresenta una storia di eccellenza e tradizione familiare che si estende per oltre 150 anni attraverso quattro generazioni della famiglia Marrocco. Fondata nel 1880 da Pasquale Marrocco con passione e identità, l'azienda ha radici profonde in Puglia, dedicandosi all'arte dell'estrazione e lavorazione della pietra. Nel corso degli anni Pimar è diventata un punto di riferimento internazionale, unendo innovazione e tradizione e guadagnandosi il prestigioso titolo di "AZIENDA STORICA ITALIANA"

A story of excellence and family tradition

Pimar represent a story of excellence and family tradition that spans over 150 years through four generations of the Marrocco family. Founded in 1880 by Pasquale Marrocco with passion and identity, the company has deep roots in Puglia, dedicated to the art of stone extraction and processing. Over the years, Pimar has become an international benchmark, combining innovation and tradition and earning the prestigious title of "ITALIAN HISTORICAL COMPANY"

Pimar, azienda leader

Pimar ad oggi si posiziona come leader di mercato, impegnandosi regolarmente in importanti progetti di rilevanza nazionale e internazionale.

Pimar, azienda certificata UNI EN ISO 9001:2015, ha ottenuto la marcatura CE per i suoi prodotti.

Inoltre, è stata selezionata tra le prime cento eccellenze italiane nel secondo rapporto nazionale dell'EURISPES.

Pimar, leading company

Pimar currently holds a leading position in the market, consistently undertaking important projects of both national and international significance. Pimar certified under UNI EN ISO 9001:2015, achieved CE marking for its products. Moreover, it has been recognized among the top one hundred Italian excellence in the second national report by EURISPES

NOTE / NOTES

ITA

Le tonalità della pietra sono indicative.

Queste tendono a variare in base alla cava di estrazione utilizzata e dal livello della stessa.

Tutto il materiale in quanto pietra naturale può avere una granulometria non omogenea, la presenza di fossili ed altro ne caratterizza la componente geologica. In caso di deposito, si consiglia la conservazione del materiale in un luogo coperto.

La pietra è un prodotto naturale che nel tempo potrebbe cambiare colore, per chi non ama ciò si consiglia un trattamento con idrorepellenti su prodotto asciutto.

ENG

The stone shades are approximate and can vary depending on the quarry of origin and its level.

Natural stone contains geological components that can be not-homogenous particles including, but not limited to, small pieces of fossils.

Stone should be kept under shelter if stored for extended period of time.

Pimar reserves the right to modify the packaging of materials.

Natural stone hues in the photos are approximate.

The limestone is a natural product and its colour could change with time.

If you does not love it we suggest to use a waterproofing sealer once the limestone has dried.
