Nel 1980 Patrizia Volpato, forte della sua esperienza nel mondo dell'illuminazione, apre il suo laboratorio artigianale in un contesto – quello di Venezia e la sua terraferma – dove la tradizione della luce con le sue forme è profondamente radicata.

Oggi, a più di quarant'anni dalla sua fondazione l'azienda ha saputo crescere e svilupparsi in un continuo confronto con la sua clientela e i temi proposti dalla storia del design e del gusto corrente.

Un confronto attento agli stimoli della contemporaneità pur mantenendo una continuità con la tradizione locale della lavorazione del vetro.

Chi ci incontra capisce che da noi le luci sono di famiglia.

*In 1980 Patrizia Volpato, drawing on her experience in the world of lighting, opened her artisan workshop in a context – that of Venice and its mainland – where the tradition of light with its forms is deeply rooted.*

*Today, more than forty years after its foundation, the company has been able to grow and develop in a continuous comparison with its customers and with the topics proposed by the history of design and of current taste.*

*A comparison receptive to the stimuli of contemporaneity while maintaining a continuity with the local tradition of glass processing.*

*Those who meet us understand that for us lighting is a family affair.*

## LE COLLEZIONI

La passione per il mondo delle luci è la linfa che ogni giorno ci impegna nel nostro lavoro, ci suggerisce nuove forme e nuovi temi di ricerca.

Da questa ricerca, in collaborazione con diversi designer, sono nate le nuove proposte di apparecchi illuminanti presenti in questo nuovo catalogo.

Nei laboratori dei nostri Maestri vetrari ogni volta si compie lo stesso rito che è quello di dare forma alla cosa più immateriale e difficile da plasmare: la luce. Ogni singolo pezzo è frutto di un gesto mai scontato, di un dialogo tra noi e i maestri vetrari la cui esperienza è parte del nostro patrimonio culturale.

Per noi il vetro è la forma della luce.

*The passion for the world of lighting is the lifeblood that engages us in our work every day, suggesting new forms and new research themes.*

*From this research, in collaboration with several designers, the new proposals of lighting fixtures included in this new catalogue were born.*

*In the workshops of our Master glassmakers, the same ritual is performed every time, that is to give shape to the most immaterial and difficult thing to forge: light. Every single item is the result of a gesture that is never taken for granted, of a dialogue between us and the master glassmakers whose experience is part of our cultural heritage.*

*For us, glass is the shape of light.*

A large, clear, organic-shaped glass sculpture titled "NEBULA". The sculpture has a fluid, flowing form with numerous facets and ridges, resembling a celestial body or a nebula. It is set against a dark, neutral background.

# NEBULA

design by Giovanni Luca Ferreri

Nickel nero opaco  
Matt black nickel

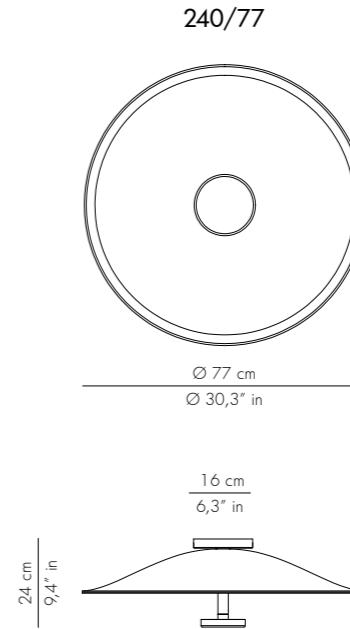

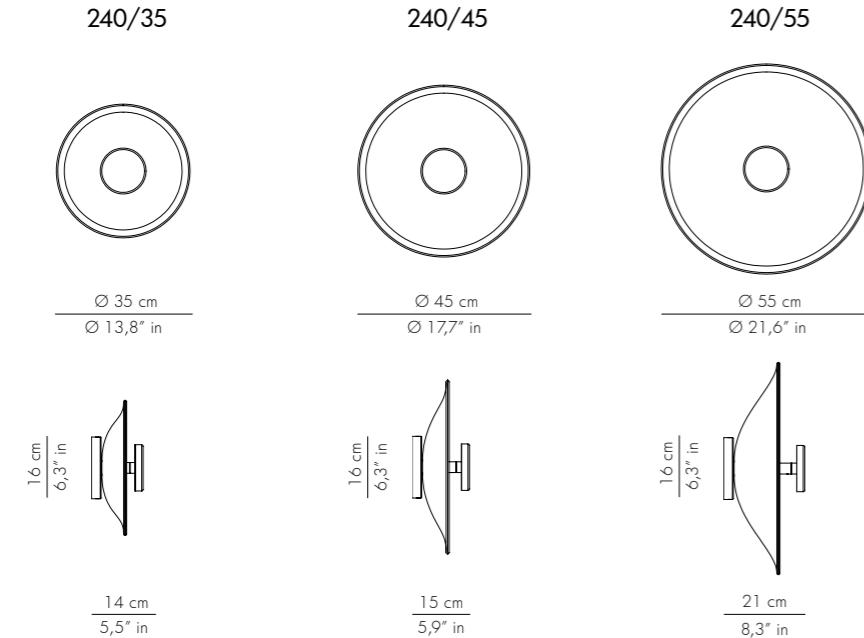

Nebula è una famiglia di corpi illuminanti il cui riflesso ricorda proprio la meraviglia delle nebulose cosmiche. Questi lampadari e applique, una volta accesi, generano una serie di riflessi a soffitto e a parete che catturano lo sguardo o lo fanno perdere in un gioco di "ombre luminose".

*Nebula is a family of lighting fixtures whose reflections recall the wonder of cosmic nebulae. These chandeliers and wall lamps, once turned on, generate a series of reflections on the ceiling and on walls that capture the gaze or make it get lost in a game of "luminous shadows".*

Una delle rare costanti dell'umanità è lo stupore inesauribile con cui l'uomo osserva il cosmo, affascinato e sorpreso davanti alla sua infinita vastità. Questo senso di meraviglia, come un filo che unisce generazioni, ci invita a esplorare l'ignoto e a sognare oltre i confini del nostro mondo.

*One of the rare constant elements of humanity is the inexhaustible wonder with which man observes the cosmos, fascinated and amazed by its infinite vastness. This sense of wonder, like a thread that unites generations, invites us to explore the unknown and to dream beyond the frontiers of our world.*

# EQUILIBRIO

design by Giovanni Luca Ferreri

Si tratta di un sistema di elementi che si ispirano alle sculture dinamiche di Alexander Calder.

Diversi elementi compongono le sospensioni mettendo in "equilibrio" apparecchi illuminanti e altri elementi che fanno da contrappeso come i cotissi, frammenti di vetro che si raccolgono a terra durante l'arte della soffiatura nelle botteghe di Murano.

Questo sistema di sospensioni fornisce infinite possibilità di allestimento per chi progetta o allestisce uno spazio.

*It is a system of elements inspired by the dynamic sculptures of Alexander Calder. Different elements form the pendant lighting items by "balancing" luminaires and other elements that act as a counterweight such as "cotissi", fragments of glass that are collected from the ground during the art of glass blowing in the workshops of Murano.*

*This system provides infinite possibilities of installation for those who design or furnish a space.*

Si tratta di un lampadario a sospensione che ha per tema quello delle formazioni nuvolose. Composto da volumi eterei e allo stesso tempo "densi". Questo effetto viene creato dalle striature del vetro alabastro che caratterizza gli elementi che compongono la sospensione. Il lampadario si presenta come una formazione di corpi nuvolosi, allineati e sospinti dal vento nella stessa direzione.

*This is a pendant lamp that recalls cloud formations.*

*It is composed of ethereal and at the same time "dense" volumes. This effect is given by the streaks of alabaster glass that characterize the elements that compose the fixture.*

*The chandelier appears as a cloud formation, aligned and pushed by the wind in the same direction.*

# GOCCE DI LUNA

design by Arbet Design

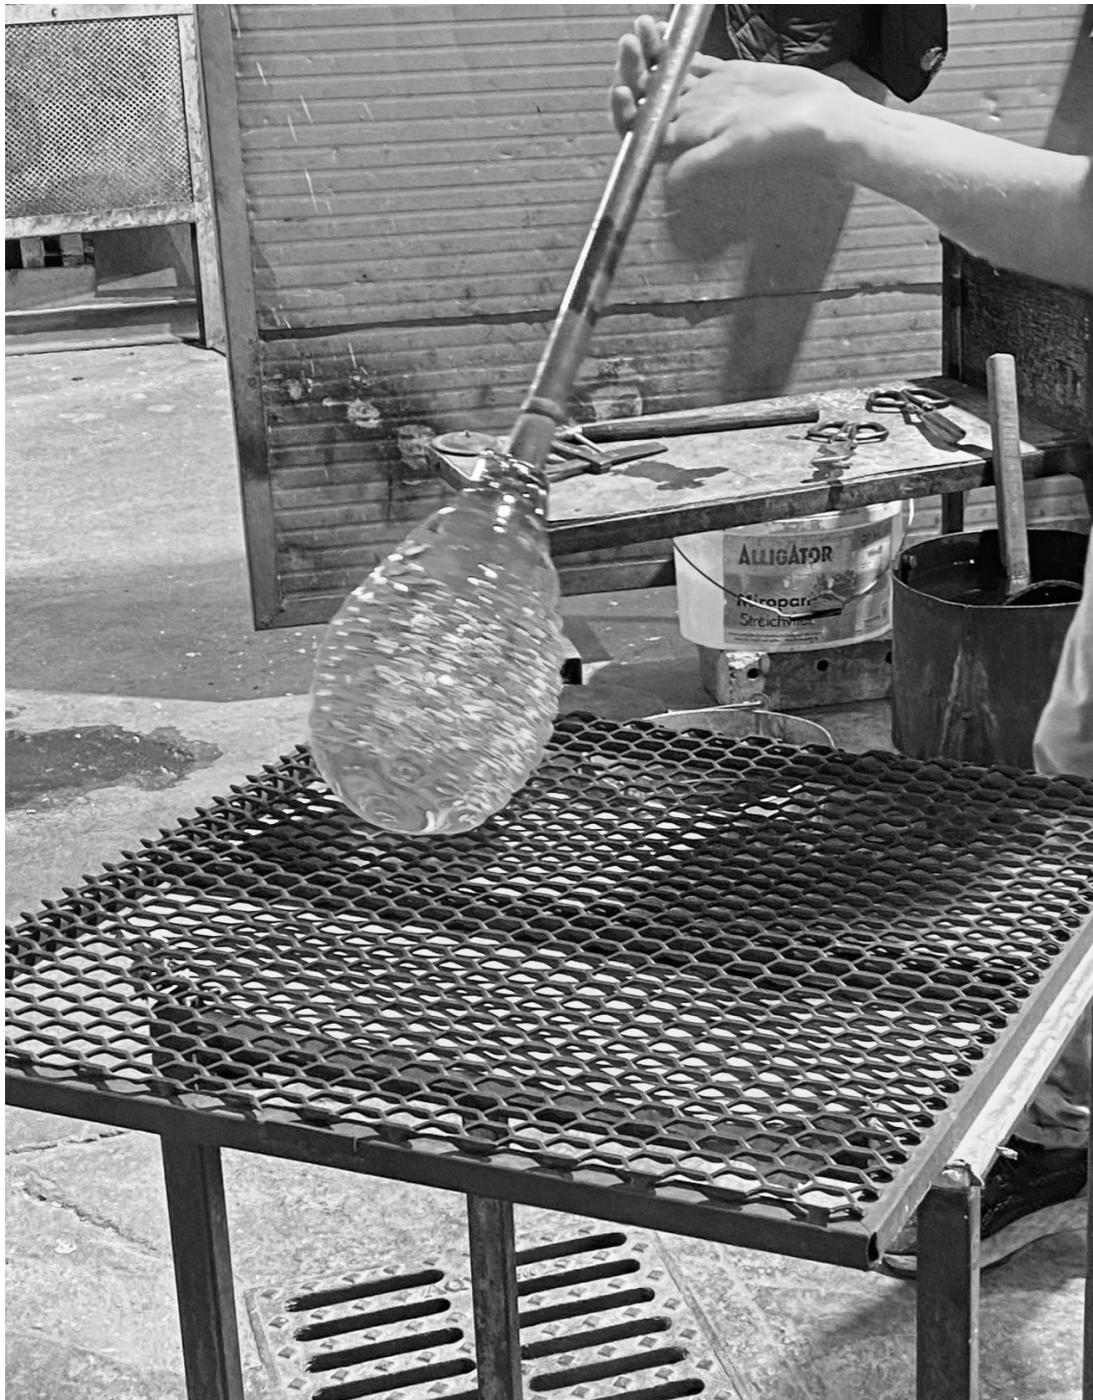

Vetro trasparente - Nickel nero lucido  
Transparent glass - Shiny black nickel

La collezione Gocce di Luna cattura la fluidità del vetro soffiato, che si espande in modo controllato all'interno di una gabbia metallica, creando pezzi unici. La luce esalta il vetro con texture "boegoso" o "balloton", diffondendosi nello spazio con morbide vibrazioni. Ogni elemento della collezione offre flessibilità di aggregazione, variando in dimensioni, finiture e colori, e trasformandosi in una fonte di luce dal forte carattere decorativo ed emozionale.

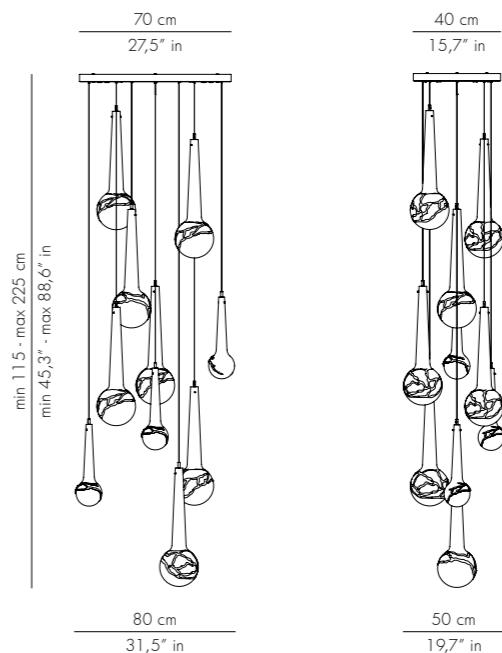

*The Gocce di Luna collection captures the fluidity of blown glass, which expands in a controlled way inside a metal cage, creating unique pieces. The light emphasizes the glass with a "boegoso" or "balloton" texture, spreading in the space with soft vibrations. Each element of the collection offers flexibility of aggregation, varying in size, finishes and color, this way transforming into a source of light with a strong decorative and emotional character.*

Questa famiglia di lampadari sospesi gioca sulla geometria di elementi concentrici costituita da diverse forme e altrettanti materiali.

Partendo dal corpo illuminante, costituito dalla barra tonda centrale, si sommano il tubo in vetro di murano e i diversi dischi policromi di marmo.

*This family of pendant lamps plays on the geometry of concentric elements made up of different shapes and materials. Starting from the lighting element, made up of the central round bar, we add the Murano glass tube and the various polychrome marble discs.*

# APHRODITE

design by Giovanni Luca Ferreri

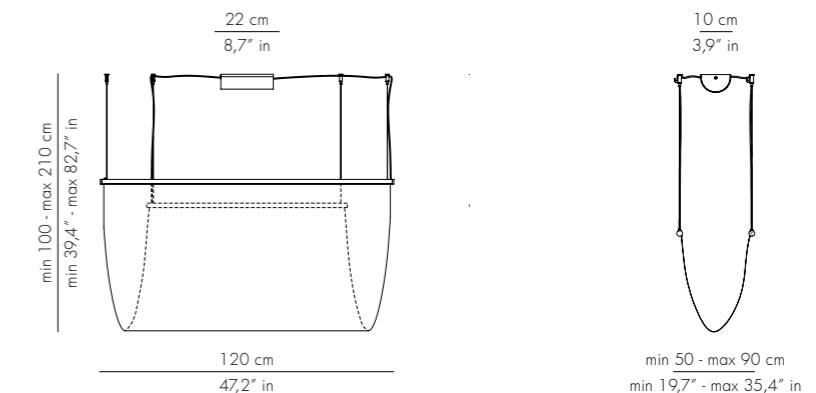

Ad ispirare questa composizione di lampadari è stato il drappeggio della splendida statua di Aphrodite conservata all'Altes Museum di Berlino. Ed è proprio il suo drappeggio fitto e seducente che questi corpi illuminanti vogliono emulare facendolo vibrare con la luce.

*The inspiration for this composition of chandeliers was the drapery of the splendid statue of Aphrodite preserved at the Altes Museum in Berlin. It is precisely its dense and seductive drapery that these lighting fixtures want to emulate by making it vibrate with light.*

*Semi-gloss brushed gold*

Per noi di Patrizia Volpato il vetro  
è la forma della luce.

Nei laboratori dei nostri Maestri vetrai a Venezia, si riesce a dare forma alla cosa più immateriale e difficile da plasmare: la luce. Ogni singolo pezzo è frutto di un gesto mai scontato, di un dialogo tra noi e i maestri vetrai la cui esperienza è parte del nostro patrimonio culturale.

Ci piace pensare che ogni sera all'imbrunire migliaia delle nostre creazioni si accendono in ogni parte del mondo.

Ovunque si trovi, un nostro lampadario parla di noi e dei luoghi in cui è stato realizzato, trattenendo un po' di quella magia che rende unica Venezia e la sua laguna.

*For us at Patrizia Volpato, glass is the shape of light.*

*In the workshops of our Master glassmakers in Venice, we manage to give shape to the most immaterial and difficult thing to forge: light. Every single piece is the result of a gesture that is never taken for granted, of a dialogue between us and the master glassmakers whose experience is part of our cultural heritage.*

*We like to think that every evening at dusk thousands of our creations are lit in every part of the world.*

*Wherever they are located, our chandeliers speak of us and of the places where they were made, retaining a bit of that magic that makes Venice and its lagoon unique.*
