RADA

Design by Stefano Esposito

Rada Lounge Chair

Rada is characterized by the use of one cable of nautical rope hand-fixed on a simple rod iron structure.

The technical rope, used for high performance sailing, grants strength against mechanical strain and deserve weather conditions

Rada Side Chair

Rada chair and armchair, perfect furniture solution for outdoor but not only. Decorate with originality, freshness and colour your dining area. The structure is in steel with special treatment for outdoor use and some cavity solutions on the rod iron, fix and prevent displacement of the nautical rope.

Nautical Ropes

The nautical ropes are braided or twisted by high-tenacity synthetic fiber and they are hand-fitted on the frame. The chromatic combination, the woven spindles, the diameters and the flexibility of rope have been planned specifically for RADA project.

LEVANTE

Design by Stefano Esposito

Levante Bar table

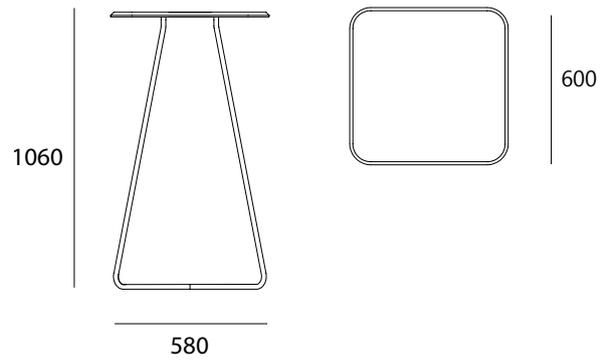

Levante Dining table

Levante Occasional Table

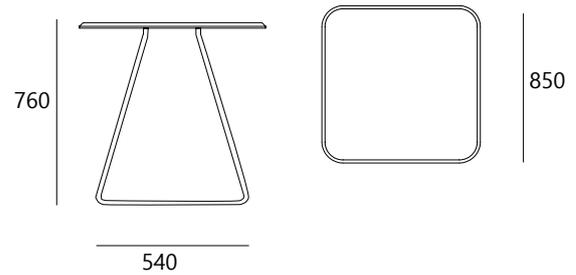

The multifunctionality of the top makes “Levante” a versatile occasional table. The tubular structure is intertwined with the top made in solid wood, highlighting the loop that joins them. The originality becomes functionality since the wooden top can be easily removed, turned upside down and used as tray for carrying anything.
