AUTUMN 2025

A TRADITIONALLY CRAFTED
CONTEMPORARY VISION OF LIGHT

BROKIS®

PRESERVING THE BOHEMIAN GLASSBLOWING TRADITION

BROKIS – a synthesis of exquisite design, superior quality, and the skill of master artisans continuing the centuries-old Bohemian glassmaking tradition. BROKIS lighting collections have achieved international acclaim by combining handblown glass with other refined materials, such as handcrafted wood and metal, in bold compositions that push the boundaries not only of contemporary lighting design but of the technologies applied in production. The family-run premium brand works with select designers from around the world and operates its own historical glassworks southeast of Prague.

BROKIS is the brainchild of successful Czech entrepreneur Jan Rabell. In 2006, he founded the brand as a platform to revitalize and elevate Bohemian glassmaking to new heights and preserve generations of knowledge and craftsmanship. Nearly ten years prior, in 1997, he acquired the ailing Janštejn Glassworks, which was established at the start of the 19th century approximately 140 kilometres southeast of Prague.

Demand for traditional products had declined significantly, many of the glassmakers were growing old and leaving, and time-honoured technologies and techniques were at risk of being lost. Mr. Rabell's vision was to restore the factory to its former prestige and ensure that the ages-old Bohemian glassmaking tradition endured into the 21st century.

With BROKIS, Jan Rabell created a lighting brand offering entirely different products than those previously produced at Janštejn Glassworks. Several new Italian-style furnaces were built, and production techniques were refined. Some, such as grinding and glass painting, were discontinued, and others were revived, like glassblowing using optic moulds and traditional hotshop techniques. Original and

nearly forgotten formulas for manufacturing coloured glass were reinstated and are now characteristic of the BROKIS brand. Therefore, it brings us great joy that in 2023 Czech handmade glass was inscribed in UNESCO's Representative List of the Intangible Cultural Heritage of Humanity.

BROKIS has firmly established itself as a leading innovator in glass lighting. For example, the complex technology applied in manufacturing the Night Birds collection, which consists of imposing yet elegant curved glass silhouettes of birds in various phases of flight, required two years of experimentation to perfect.

BROKIS is constantly developing new technologies for its lights in order to offer consistent industry-leading quality and innovation throughout its global product portfolio, such as with a special original connector, the sustainable material called BROKISGLASS, and TRIMLESS, a sleek new system for hanging pendent lights from lowered drywall ceilings. BROKIS has also recently developed a series of configurators for some of its most popular collections. These powerful online tools let customers create their very own bespoke lighting compositions in a user-friendly, intuitive interface.

BROKIS also maintains a strong online presence through a series of innovative initiatives, such as BROKIS VIRTUAL PROJECTS and the unique MyBrokis application. In January of 2022, BROKIS launched a website within Janštejn Glass Group (JGG). Today, BROKIS and Janštejn Glassworks employ more than 100 people and enjoy a unique symbiosis that has allowed BROKIS to establish sales operations in 120 countries and regularly showcase its renowned lighting collections at the world's top design shows.

JAN RABELL

“NOTHING’S IMPOSSIBLE;
NEVER SAY IT CAN’T
BE DONE.”

Entrepreneur Jan Rabell is one of the most dynamic figures in the Czech Republic’s glassmaking industry. Born in Prague in 1965 to a Puerto Rican father and Czech mother, he grew up in his father’s homeland, later returning to Prague to pursue a master’s degree in economics. He went on to hold various managing director posts in the field of finance and banking. In 1997, he purchased the ailing Janštejn Glassworks and set about restoring its prestige and competitiveness primarily by introducing unconventional glassblowing techniques and production technologies. In 2006, he founded the family-run premium glass lighting brand BROKIS, quickly developing it into one of the most important players in the market and exporting its products around the world. Mr Rabell’s charisma, energy, and innovative vision continue to propel BROKIS and Janštejn Glassworks steadily forward.

LUCIE KOLDOVA

“I SEE A LIGHT AS A SCULPTURE,
AN OBJECT RADIATING ENERGY.
I SHAPE THE ENERGY OF LIGHT
THROUGH THE RELATIONSHIP
BETWEEN THE SOURCE
AND THE GLASS”

BROKIS art director Lucie Koldova is an acclaimed Czech product and furniture designer. Her collaboration with the lighting brand began in 2010 with the timeless Muffins and Balloons collections, which she designed while living and working in Paris. The voluminous glass lights embody her charismatic, elegant style and quickly established BROKIS as an innovative producer of handblown glass lighting. She is the creative force behind the brand and is instrumental in shaping its product portfolio and image. Her creations, objects of desire, include glass sculptures, glass lighting, poetic gallery pieces, and limited series works. Breathtaking colours, unusual proportions, and vibrant formal contrasts move her work seemingly beyond the realm of the possible, a trademark at once apparent in lighting collections such as Macaron, Puro, Ivy, and Spectra. In addition to developing ever-more novel and exciting motifs, Lucie Koldova has introduced important technological and formal solutions that have enabled BROKIS to push the limits of handblown glass production.

PEOPLE

BROKIS has sustainability in its DNA. Natural resources are integral to glassmaking, and BROKIS uses them in accordance with the principles of circular economy. A leader in glass upcycling, BROKIS began developing BROKISGLASS in 2010, achieving 100% reuse of waste glass in a new ecofriendly material. The translucency of BROKISGLASS makes it ideal

for BROKIS lights, and some have won international awards for sustainability. New applications arise from constant innovation. In 2025, BROKISGLASS completed the Life Cycle Assessment (LCA) process and is undergoing EPD certification. See the BROKIS Sustainability Report for details.

In 2023, handmade glass was inscribed in UNESCO's Representative List of the Intangible Cultural Heritage of Humanity. From the very inception of the BROKIS brand, its defining mark has been superior quality in glass artistry and manufacturing. For several centuries, Bohemian glassmaking has been synonymous

with unsurpassed quality and beauty. Today, it is an inseparable part of the cultural legacy of the Czech nation, and we are thrilled that it has been recognized on a global level by UNESCO as a significant manifestation of humanity's living heritage.

SUSTAINABILITY

UNESCO

During the covid pandemic, BROKIS introduced a unique concept of online spaces designed to accentuate the singularity of the brand's lighting collections. Showcasing the lights in realistic interior and exterior settings, these exclusive virtual projects evoke a wide range of emotions. BROKIS conceived the idea at a time when conventional means of presentation were greatly restricted, and the company

was one of the first to pioneer the use of virtual spaces. BROKIS has devoted considerable attention to the various advantages of the virtual platform, one of which is the ease of access to necessary architecture files, technical documentation, and BROKIS innovations. The virtual projects were created by the studios Salaris and Suprema in close collaboration with BROKIS.

In mid-2023, BROKIS organized a photoshoot in Italy and France in collaboration with Italian stylist Simona Sbordone and photographer Max Zambelli. Over 120 lights were photographed in four exclusive locations, using collections from across the BROKIS portfolio. The output of the project is a printed

magazine featuring the majority of the photographs, which was presented to the public in 2024 at Salone del Mobile in Milan and is available to selected business partners and clients. The project was created as a brand statement and marks the beginning of a new chapter of presentation.

NOVELTIES

The fleeting moment when molten glass becomes a solid yet infinitely delicate object – such is the inspiration for Under Pressure, a bold new collection of lights that captures this transformation and the exciting tension it creates. That singular, magical instance when hot molten glass succumbs to pressure and begins to assume its final form, an embodiment of strength and fragility in one. The dynamic glass shapes appear still alive, evoking an image of organic deformation from external forces, an invisible pressure bending them to its will. This striking visual effect

is further accentuated with technical elements, such as a centre-line threaded rod that penetrates the delicate glass globe and brings a touch of geometric regularity and industrial elegance. Under Pressure delivers an impressive contrast, an alluring juxtaposition of the organic malleability of glass and uncompromising precision of metal. The lights are manufactured in assorted sizes and typologies, backed with a broad spectrum of glass colour and surface finish options, for a look that always catches the eye and elevates the aesthetics of any interior.

Introducing Comet, an all-new collection of pendant lights combining modern technologies with the timeless beauty of handblown glass. Comet brings a touch of cosmic elegance to the interior in both home and commercial settings. The collection comprises lights inspired by the tail of a comet in the night sky, its effect reminiscent of stardust. The lights are crafted in two shapes – Comet Round and Comet Square – each available in three different sizes. This allows for a wide range of creative compositions, from elegant solitaires to large-scale lighting installations in hotels, staircases, and entrance halls. Each Comet is handblown from laminated glass, with

DESIGN

grains of silica sand added between the layers to render a unique celestial effect that gently diffuses the light throughout the surrounding space. Comet pendants are equipped with modern technologies, such as an efficient LED source and diffuser for both direct and indirect lighting, and fluid touch dimming that puts the desired ambience at the user's fingertips. From minimalist arrangements of a few individual lights to breathtaking curtains of night-sky enchantment, the flexibility of the Comet collection opens exciting new lighting possibilities for commercial and public venues, such as hotels, lobbies, and grand staircases.

NIGHT BIRDS & MINI

Inspired by the abandon and freedom of bird flight, the innovative Night Birds suspension lights impart poetic enchantment and unparalleled dynamism to any interior. Night Birds differ from the other collections in the unique technology applied in production, which involves melting glass into a mould and then bending it. The process makes it possible to instil delicate nuances in the shape of the wings and achieve a colouration of the glass that is different and wholly unique each time. The restraint and directness of the Night Birds family are underscored by a minimalist LED light source. Night Birds comprises three unique lights, each with a different wing position. They come

in either white, dark (nearly black), or BROKISGLASS, and there is also an outdoor variant. Night Birds are most impressive in large flocks. The indoor and outdoor lights share the same engineering, which allows a greater selection of light sources and simplifies installation and balancing. The Night Birds family has been expanded with a new interior light called Night Birds MINI. This smaller sibling makes the ideal complement to the full-sized lights and is perfect for smaller spaces where larger flocks would appear cramped. Suspended from elegant coaxial cables, MINIs are perfect for illuminating intimate dining areas and conference tables.

The Planets collection is based on period lights and reflects the daily needs not only of customers but of architects and designers too. Thanks to a simple physical principle, the lights can be variably positioned in diverse arrangements. The use of weights and pulleys makes it possible to quickly adjust the height of the lights, a unique system that allows for several groupings to serve as individual sources of light in an interior, or as multiples of three different (or same) shapes to illuminate larger spaces. The counterweight is precisely calibrated to the specific weight of the light, so adjustments are safe and easy. A round LED panel is situated beneath a shade of matte glass, which conceals the internal

parts and thus preserves the silhouette of the light. The metal components also come in a matte finish and are combined with a textile cord for a uniform look. The colour scheme is always monochromatic to underline the graphic character of the lights, and the glass shades are rendered in elementary geometric shapes – sphere, cone, and capsule. The Planets collection stands out with its remarkable versatility, offering a broader dimension in interior lighting with installations ranging from a single light to vast clouds of up to twelve lights. The Planets family has been expanded with a new version called Planets MINI. BROKIS has online configurators to simplify the creation of unique lighting compositions.

MUFFINS

The timeless Muffins collection represents an extraordinary lighting experience. Since its market debut, it has taken on an iconic status and become a symbol of the BROKIS brand. The sublimity of the design lies in the masterful combination of delicately contoured glass and solid wood. The lights, featuring a billowing glass shade set in a handcrafted wood base together with a naked filament bulb, breathe new life into any space and elicit a festive

DESIGN

ambience. The collection offers multiple shape and size variants as well as a broad palette of glass colours and woods. In 2025, Muffins is celebrating fifteen years since its introduction. To mark the occasion, BROKIS has created a special anniversary edition featuring Italian travertine, a stunning natural material that underscores the timelessness and distinctive character of this iconic collection.

DOME

A nod to classical Roman architecture, Dome is a family of elegant pendant and table lights inspired by the great domes of Venice and evoking the eternity and expansiveness of the celestial vault. The elegant shade, comprising multiple layers of molten glass, each carefully inspected by the master glassmaker prior to blowing, comes in either smooth or wavy clear glass. The gentle illumination is cast forth from a modern LED source concealed beneath an opal diffuser. With the levity of their delicate arches,

the pendants are ideal above large dining tables, either in multi-light compositions or as solitaires, while the table variant brings a unique intimacy to smaller spaces. The Dome family is also home to Dome Nomad, a convenient battery-powered light for outdoor use, whose portability makes it ideal for terraces and gardens. Dome provides a wholly unique lighting experience in both residential and commercial settings.

STARCLOUD

Set off on a journey through the heavens with this enchanting masterpiece of stellar beauty, a mesmerizing nebula of gracefully intermingling lights cast against the night sky. This bespoke collection of pendants is based on an abstract astral form, which flows seamlessly into three distinct objects, Atria, Lyra, and Vega, each a work of art in its own right among its celestial companions. These stars project a subtly different optical effect depending on the viewing angle, appearing to variably wax and wane or come to rest in a state of symmetry. Suspended on slender

coaxial cables of varying lengths, the delicate handblown glass shades are available in four variants: opaque opaline, pearl pink opaline, pearl grey opaline, and olive opaline. The collection offers six predefined sets of various sizes, each with its own custom ceiling canopy, but there is no limit to how the lights can be mixed and matched in original compositions. Starcloud thus provides a remarkable degree of variability, inviting users to create their own holly unique interior starscapes. A special online configurator offers even greater possibilities.

CONVEX

The Convex collection experiments with BROKISGLASS and makes use of its specific properties and processing methods. Designed and manufactured in the form of a convex lens, it pushes the boundaries of function, visual representation, and shaping of this unique and vibrant material. Together with a minimalist, precisely crafted body, it creates an unobtrusive yet unconventional luminaire. The utilitarian design, which highlights the beauty and optical

DESIGN

properties of the glass, is well suited to a broad range of applications in both residential and commercial spaces. The Convex collection comprises a pendant and a wall light, each available in two sizes, whereas the wall variant can also be mounted on the ceiling. Choose from clear triplex opal, or a combination of clear triplex opal and grey triplex opal, where the darker fragments gradually transition to lighter towards the centre of the glass.

The outline of the light resembles the classic typology of a table lamp, which has always been a companion to humans during evening sessions. The archetypal silhouette in a purity-of-form concept has an opening with a double-sided light source in an aluminium fixture. The flat source casts its light gently in two directions, upwards and downwards into the glass base, creating intimate atmospheric effects. The two sizes are available in

DESIGN

transparent, smoke brown, smoke grey, or opaline glass. The intensity of the experience can be modulated thanks to an integrated dimmer. The shape of the mantle, which serves as the shade and base in one, evokes a sense of levity and loftiness. A specialized method of glassblowing is needed to create the mantle as a single piece. The overall appearance of the light emphasizes the idea that beauty lies in simplicity.

THE BROKIS PORTFOLIO

BALLOONS

Balloons, a collection of timeless lights embodying rudimental forms that evoke images of hot air balloons, captivates with the beauty of large-format handblown glass and an elegant metal reflector hovering within. The design's charm lies in the use of two independent glass sections to achieve the impression of an integral whole. Lavish proportions and an elegant hand-pressed metal reflector are

DESIGN

the collection's defining traits. The size of the largest shade pushes the very boundaries of glassblowing technology and illustrates the exceptional skill and craftsmanship of Bohemian glassmakers. The Balloons collection is one of the pillars of the BROKIS portfolio. The lights come in three sizes. Balloons also make an outstanding sculptural statement during the day when they are switched off.

The Shadows family is a take on the famed, timeless lights found in French ateliers, and its typology pays tribute to that legacy. The combination of handblown glass, handcrafted wood, and classic shaping has given rise to a light of ageless elegance. Two collections comprise four different pendants, as striking alone as they are in sets, characterized by a handblown glass shade set upon on a handcrafted wooden fixture. The clean contours and finish are accentuated by the concealed light source. The Shadows family is special not only for its wide spectrum of glass colour options, surface finishes, and types of wood but also because the lights can

DESIGN

be combined in sets according to customer requirements. With near endless combination possibilities, the lights are well suited to a broad range of interior applications. In the Shadows XL collection, the contours remain true to the original Shadows lights but are nearly 50% more robust in their proportions. There is also an outdoor version for installation in exterior settings or interiors with increased humidity levels, such as wellness centres. These feature an IP54 rating and a two-piece weatherproof dural body instead of wood. All Shadows lights are fitted with special integrated connectors developed by BROKIS to facilitate installation and cleaning.

MEMORY

The Memory collection awakens the imagination and beckons back to a carefree childhood. The wall and ceiling versions in different sizes, the wide range of colour options, and a selection of finishes give this lighting experience a large degree of versatility. The illusion of inflated balloons is flawless right down to the dangling string, which serves to switch

the light on and off. This is beauty in its simplest and most persuasive form. The Memory collection consists of ceiling and wall versions in three sizes. There are also sets that allow multiple lights to be combined on a single ceiling canopy. New colours and shapes are now available in celebration of the collection's ten-year anniversary.

ENDING PART AND CORD

Capsula is a sophisticated and exhilarating light bearing resemblance to a plant cell or seed. The nucleus of the piece is a tubular triplex-glass LED light source, developed by BROKIS, that transects the inner shade and translucent external shell to form a notional axis. The layering and overlapping of these three distinct components give rise to dramatic 3D optical effects. The end caps fasten the components together and serve as anchor points for the creative dual suspension straps, which also conceal the power cable and

allow for variation in the final positioning of the light. The Capsula collection is offered in sets as well as individual lights that can be combined per customer requirements. As of spring 2018, Capsula is fitted with special integrated connectors developed by BROKIS to facilitate installation and cleaning. Beginning in 2025, the collection features a new BROKISGLASS option, bringing a refreshed visual experience that further underlines the overall singularity of the lights.

MONA

The Mona family is based on the concept of penetrating forms. The light source boldly traverses the ample volume of smooth handblown glass to reveal the thrilling tension inherent in the design. The collection's essence, however, lies in its unconventional construction and refined combination of materials. It also boasts dimmable tubular LED light sources, developed by BROKIS, each with a different colour temperature. The entire Mona family has been technologically improved with innovative connectors

and the replacement of the wood components with metal ones. These improvements make it easier to change out the light source and clean the lights. The wall variant is dimmable via a newly integrated dimmer in the lower part of the metal fixture, and the table variant now offers touch dimming. Mona offers a wide selection of glass and leather strap colour options. The collection comprises several sizes (S, M, L, XL) and various types of lights (pendant, floor, table, wall).

WHISTLE

PH-6358

The Whistle collection is, quite literally, a living reference to the work of glassmakers, as inspiration for the design was taken from the blowpipe, which in Czech is known as a glassmaker's whistle. The lucid body of the piece traces the silhouette of a cone of light, and a distinct spotlight with hand-pressed metal shield constitutes its imaginary heart. The overall shape and the naked cable winding its way up

through the body of the light define the character of its simplistic technical form. The collection comprises a suspension light in two sizes as well as a set of three lights, each available with a broad choice of glass colours and surface finishes. As of March 2018, Whistle is fitted with special integrated connectors developed by BROKIS to facilitate installation and cleaning.

LIGHTLINE

In its every component, the Lightline collection is a celebration of glass as an artistic medium. The concept of a line of light is rooted in the varying characteristics of the material and its forms. The design employs the effect of light uniformly dispersed over a sandblasted surface, which in profile creates the impression of a luminous line.

DESIGN

The LED light source is embedded in the base beneath a metal and triplex opal glass shroud. The upper surface, sandblasted by hand, is treated with a special nano coating to prevent the accumulation of dust and smudges. The collection comprises four table lamps that cast a light of intimate character.

Knot, a family of stately pendent lights, contrasts two dissimilar materials, two dissimilar notions: gentle curves in clear handblown glass against the austerity of coarse rope. The resulting design is striking and forthright yet dignified at the same time. Full-bodied globes of varying shapes and sizes are penetrated by robust rope ending in the core design element of the collection – the knot – which seemingly pulls the bottom of the glass inward for a bemusing plastic effect. The LED light source is mounted

beneath an elegant hood made of stamped metal and protected from below by a handblown triplex opal diffusor. Another metal component serves to cap the end of the rope. The family comprises lights of four different shapes in two sizes with a variety of colour options. Additionally, there is a romantic table light, now available in a variant for exterior use, and a portable battery-powered light, both of which are manufactured in two different sizes.

PURO

Puro is a boldly minimalistic variation on atmospheric pendent lights. Inspiration for the collection and its name come from the Spanish word for “cigar”, which also means “pure” and is a reference to the composition’s clean lines. The original design in the Puro family creates an intriguing interplay between horizontal and vertical luminous cigar tubes levitating in space above simple bell lights. The diffused glow of the tubes combines with that of the bells to elicit a dynamic ambience, while the alternating gloss and matte finishes provide a degree of provocation. The first variations to appear were a bell light suspended beneath a single vertical tube and dual bell lights suspended beneath a single horizontal tube.

DESIGN

LUCIE KOLDOVA

Multiple tubes can be combined to create amazing installations, such as a screen to divide space and evoke an intimate atmosphere bordering on scenography. BROKIS has an online configurator to simplify the creation of unique lighting compositions. The endless variability of the Puro collection gives rise to new lighting objects for any interior. The Puro family – Solo, Single, Spotlight, Eclectic, Contour, Sparkle, and Floor – are available in various sizes in either matte triplex opal or smoke grey glass. Puro have special integrated connectors developed by BROKIS for improved variability and ease of installation and cleaning.

MACARON

The Macaron table light pays homage to the beauty and complex structures of crystalline stone. Enclosed in opposing domes of delicate handblown glass, the stone becomes a moonscape afloat in its own cosmos. The light source casts its glow upward from the onyx base to energize the meandering chalcedony veins in the centre onyx plate and create a subtle and mesmerizing lighting effect. The concept is based on the principle of illuminating stone, and the name refers to the light's similarity in shape to the famed French meringue confection. Natural imperfections in the glass and the diversity

of structures in the stone make each light a unique original. The purity of the natural materials and the artisanship applied in processing them have given rise to a light of extraordinary ambience. Produced using traditional techniques, Macaron is characteristic of the distinctive and enduring aesthetic of the BROKIS brand. Macaron comes in three sizes – the largest of which also makes an attractive floor light – and in several glass colour options with either white or honey onyx. The collection offers an alternate version featuring a centre plate made of BROKISGLASS in combination with a wooden base.

This large-format light with matte core by designer Lucie Koldova embodies a gentle poetry, simplicity, purity, and balanced proportions. A key role is played by the inoculation of luminous bodies and their mutual interaction in space – the light emitted from the smaller glass core flows freely through the atoms of air within the symbolic protective shell of the outer globe, while the sophisticated design of a bubble suspended in a large sphere evokes a sense of levitation. In keeping with the brand's ongoing development of new technologies at the highest levels of quality

DESIGN

and innovation, the Big One collection has received a technological upgrade in the form of a new LED panel that significantly increases the output of the lights. Enhanced metal components simplify handling. The outer glass features a gloss finish in the following colour options: transparent, smoke grey transparent, and smoke brown. The inner glass features a matte finish in the following colour options: triplex opal, smoke grey transparent, red transparent, light pink transparent, and smoke brown. The Big One collection is available in two sizes.

IWY

Nature and its life-giving beauty and strength are the inspiration behind the unique lighting concept called Ivy. Just as the plant grows and climbs up the wall of a house, so too can Ivy expand into a variety of compositions. The family features a special system of modular components and uses coaxial cables for a highly innovative take on decorative pendant lighting that is easy to install and arrange. The solitary Ivy Single comes in three sizes and is hung separately. The family features metal components in combination with handblown glass. Branches come in six basic sizes, while there are three sizes of shades in handblown matte light rose, triplex opal, or smoke glass. In addition to the pendants, the family

also offers an impressive floor light, distinctive ceiling and wall variants, an intimate table light, and a portable battery-powered light. Elegant and precise in craftsmanship all the way down to the smallest detail, Ivy is a high-tech lighting concept perfect for project and residential applications. In household settings, a single graceful branch can be hung above a dining table, or multiple branches can be used to create a curtain of light. The organic Ivy family takes many forms and rightfully holds its place in the realm of artistic, bespoke lighting solutions. BROKIS has an online configurator to simplify the creation of unique lighting compositions.

AWWA

In Japanese, the word 'awa' is used to describe a bubble of air trapped within a liquid. The design of this delicate light was inspired by the notion of soft glass that has retained its shape after being inflated. The aim is to give the impression of a luminous ball of air floating gently in space when viewed from below.

DESIGN

Another special characteristic of the design is that the wood and metal parts appear to be made of glass, as if they were stoppers keeping the air from escaping. A recent addition to the collection is a version featuring frosted glass in the top half of the light.

BONBORI

The very first outdoor light in the BROKIS portfolio, Bonbori was created by world-renowned Japanese designer Fumie Shibata, who took inspiration from the traditional paper lamps that line the paths to shrines and temples during the annual paddy harvest festivals in Japan. In Japanese, the word 'bonbori' not only denotes this traditional form of illumination, but it also describes the soft light coming from within a snowy cave. Manufactured with an IP44 rating for outdoor use, the light stands upon a simple stainless-steel base with weather-resistant powder coating. The easily removable LED light source, which can

withstand below-freezing temperatures, casts its gentle glow through a handblown triplex opal diffuser and laser-cut openings in the stainless steel. The likeness to the traditional bonbori lamp is completed with an elegant shade, an extraordinary piece crafted from multiple layers of carefully blown glass. Bonbori now also comes in a dedicated wall variant and a portable interior variant. Whether in the garden, on the terrace, or inside the home, the soothing light of Bonbori pays tribute to a Japanese tradition by creating a unique and festive ambience to be enjoyed as thoroughly in solitude as with family and friends.

The Sfera family offers three shapes and several sizes of lights designed to meet the needs of demanding projects and the architects and other professionals behind them. The prevailing characteristic of the Sfera project light is a clean cut across the top that serves as a platform for an elegant decagonal fixture. The timeless object casts a gentle luminance through handblown matte opal glass, which is attached to a metal plate with a subtle multangular detail. The sphere is crafted in eight sizes (150 to 600 mm), and a practical BROKIS connector facilitates installation and cleaning. The universal beauty and simplicity of the Sfera family mean it can be used in any space and in any number, from a single light as an elegant accent, to large bespoke compositions

DESIGN

of different shapes and sizes. A later addition to the family is Sfera Portable, a rechargeable outdoor light. Available in two sizes, it features a small sphere of handblown matte or gloss glass set within a concrete base with the same subtle multangular detail used throughout the family. A stainless-steel hoop serves as a handle for moving the light from one place to another. Handblown glass anchored in a raw, almost brutalist concrete base is an excellent match for modern architecture, but it can also be used to great effect when set in contrast with historical buildings. Sfera Portable is a stylish atmospheric lighting object designed for both outdoor and indoor applications.

Geometric accentuates the aesthetic expression and structure of BROKISGLASS, which itself is remarkably distinctive. The collection is defined by basic geometric shapes that characterize the overall contours of the lights and instil them with a singular graphic element to achieve a striking contrast with the animate, almost sculptural makeup of the glass. The suspension components comprise glass geometric shapes, their edges rendered in black profiles. The circular and oval lights work well as solitary pieces, and multiples can also be arranged in a sort

of jigsaw puzzle, which in the hands of architects results in an endless variety of lighting combinations. The concept surpasses its primary function as a lighting fixture and opens the door to large-format blocks of light and other uncommon compositions. For even more expressive freedom and a truly bespoke lighting experience, clients can specify a different colour of glass in each of the two sections of a light. Resting against a sturdy cylindrical base, the Geometric Table elicits a subtle aesthetic tension that amplifies the overall visual experience.

The Orbis collection is based on a universal shape rendered in handblown smoke glass that has been abruptly severed across the top to accommodate an elegant multangular metal fixture. Rich in ambience yet enticingly minimalist, these atmospheric lights embody a sense of technicism. A diffuser conceals an LED panel within the fixture and softens the light as it radiates outwards from its source, while the multiangle serves to house a special BROKIS connector engineered for easy installation and arrangement of grand lighting compositions.

DESIGN

Additional variability is provided by a choice of subtle grey smoke glass, with the metal fixture finished in a black powder coating that underscores the gloss of the transparent glass. These refined components come together to create an unmistakable interior charm well suited to large restaurant and hotel spaces as well as intimate private interiors. Available with glass in one of several colour options, each of which is paired with metal components in a predetermined corresponding colour.

DOUBLE

Double, a collection of elegant pendent lights, is based on a shape comprising double elements crafted from different materials – glass and light-weight aluminium. These materials depend on one another to generate a unique and consonant form. The glass globe terminating in a metal ring provides a suggestive effect, with the handle on top alluding to the idea of portability. In the pendent variant, which is available in three different shapes, the upper metal section with wire rope seeks equilibrium in

the scattered light and shadows as they pass through the lower metal ring and globe, while the latter consists of multiple layers of molten glass that are carefully scrutinized by the master glassmaker prior to blowing. The luminance of the LED light source is softened by a diffuser. By virtue of its scope, the Double collection is ideal for private interiors and works very well in large compositions and colour combinations. The collection has been expanded with table and floor variants.

Modern yet timeless. Extravagant in its style and use of clean geometric forms. Inspired by architecture. The Overlay collection arose from a synthesis of various materials on mood boards during a creative process that involved seeking ideas and associations between art and design, overlaying different textures, and playing with volumes. The blown transparent glass tubes instil the Overlay collection with a distinctive character, as does the unique concrete fixture embedded with shards of upcycled glass from Janštejn Glassworks. The piece is cast in different

rectangular volumes specifically for each type of light, accommodating both simple and multiple assemblies for a remarkable degree of versatility. The centerline matte light tube seemingly levitates inside a delicate sleeve of either frosted or clear glass cradled in the concrete. The typology of the Overlay collection comprises horizontal pendant variants, table lights, and wall lights that open new possibilities in lighting art. The collection has now been expanded with other variants and in 2025 received a number of technological upgrades.

PRISMA

The dominant feature of the Prisma collection is an extravagant metal fixture with a distinctive finish. Classic handblown glass spheres are anchored to either one or both ends of a robust decagonal metal prism that lends the collection its name. The shape in combination with the striking surface reflect light at different and unexpected angles, like a prism. With a choice of three different elegant finishes – yellow zinc lacquer, brushed steel lacquer, and a new burnished black lacquer, the light is a bold artistic object in the interior offering unique vertical, horizontal, and diagonal compositions with subtle colourful

DESIGN

reflections. The collection consists of a horizontal pendent light with dual glass spheres and a vertical pendent light with a single glass sphere, both of which hang from wire ropes. Another typological variant is an impressive floor light, a majestic light sculpture in the form of a robust upright decagon topped with a luminous glass sphere. The structured finish on the metal fixture is one of the defining traits of the collection, and together with transparent glass or grey smoke glass constitutes a jewel with which to adorn private interiors as well as hotels and restaurants.

Bamboo Forest draws inspiration from the vertical contours rising up in stands of bamboo. Conceived to evoke a unique atmospheric ambience, the hand-sculpted glass forms a bamboo stalk complete with the typical nodal ring, where the material thickens, creating a soft accent in the form of subtle shadows. With different sizes and varying positions of the node on the stalks, thanks to which the origins of the collection are at once recognizable, compositions of multiple lights transform the interior into a sanctuary replete with the soothing tranquility of a natural

bamboo forest. The innovative BROKIS connector enhances the overall variability of the lights by simplifying not only installation of large sets but also maintenance and cleaning. Bamboo Forest is unique for the unusual shape of the lights, which come in six different variants, as well as for the possibilities the collection offers in creating both original combinations and single-point accent lighting in interior spaces. Larger compositions can be easily designed in the BROKIS online configurator.

TROTTOLA

Trottola is a collection of suspension and table lights whose shape elicit memories of a popular childhood toy – the spinning top. The aesthetics of the design are carried on an enchanting luminance that passes through an opal diffuser and opaline glass to reveal a playful contrast of shadows and light. The LED source, visible only from above, is housed in a base clad in pressed aluminium, which in turn is finished in an attractive and durable black anodize. Brightness

DESIGN

can be adjusted with a simple turn of the elegant dimmer. Trottola offers two sizes of suspension and table lights in handblown opaline glass. The table variant is fitted with the innovative BROKIS connector, which makes it easy to disconnect the light and move it about the interior and also facilitates disassembly for maintenance. The collection has been expanded with a wall version called Trottola Applique, which can also be installed on the ceiling.

ELO

Elo, an innovative new suspension light combining the distinctive textures of BROKISGLASS with elegant aluminium framing, comprises three articulated arches, the outer two of which can be locked in different attitudes. The unique solution offers a variety of striking scenographic compositions that can shape the interior and lend it a dominant design element. The name Elo means 'ring' or 'bond', words that adeptly express the grand decorative potential and remarkable variability of the concept,

DESIGN

a sculptresque entity that can be modified and customized as the demands of the setting evolve. The glass is set in elegant metal frames crafted from aluminium, which ensures outstanding structural integrity. Illumination is provided by flexible LEDs that follow the curvature of the arches, underscoring the intrinsic aesthetic beauty of the BROKISGLASS and effecting a charming diffusion of light no matter what configuration the piece is installed in.

IMPORTANT INFORMATION

BROKIS products and services can be found on the latest version of our website – www.brokis.com. Our sales partners are regularly informed of news and any changes to products and/or services. In order to streamline cooperation with our sales partners and promote sales of our products and services, we've created new marketing tools, which are available through the MY BROKIS partner platform at www.mybrokis.com. These tools, which include ordering, informative documents, PR materials, and an overview of complementary services, support product sales growth and help us develop. BROKIS is also introducing optional product registration, which will allow customers to verify the authenticity of their lights. More information on product registration can be found in a special QR code at the end of the catalogue.
