BRASS CRAFTING MASTERS WITH VISION AND EXPERTISE

Creative brass crafting is an embodiment of an artist's vision, brought to life by their effort and expertise. Castro Lighting's production takes place in its factories in Portugal, where the best quality lighting solutions are created. The manufacturing process is supervised by experienced professionals who are constantly looking for new and original techniques and approaches. The handling of brass is the history and foundation of Castro Lighting, being its responsibility to inspire and empower future generations to keep the tradition alive. Hand-wrought work can never be entirely replaced by machinery.

The Mondrian Collection

Piet Mondrian is recognized for the purity of his abstractions since he radically simplified the elements of his paintings to reflect his perception of the world as opposites and asymmetry. This painter's unique artwork inspired the designers to develop the Mondrian Collection. Composed of geometrical squared shapes and cascading crystals, this design itself is an interpretation of dynamism and elegance.

The Eclipse Collection

The Eclipse Collection was named after the solar eclipse phenomena when the moon creates a shadow that partially inhibits sunrays from being seen from Earth. Recreating this natural wonder, this design is composed of two rounded brass plates with a slight distance between them, only allowing little crescents of light to shine through. The front plate is hammered by hand, reflecting light in the shiny finish in the back.
