VERNICI | PAINTS

Le vernici utilizzate sono a basso residuo secco e atossiche.

Per le essenze e i laccati opachi il ciclo di verniciatura è ad acqua, mentre per i laccati lucidi a solvente.

Il tipo di finitura per l'essenza è a poro aperto e la superficie subisce una lavorazione di spazzolatura.

Le vernici all'acqua permettono di ridurre le emissioni di solventi in atmosfera, sono contraddistinte dall'assenza di odori e tutelano la salute dell'operatore e dell'utilizzatore finale.

The paints employed are low-residue ones and atoxic.

For the wood and lacquered matt finishes, water-borne paints are used. For the lacquered gloss finishes solvent-based paints are used. The wood finish is an open-pore one and the surface is submitted to a brushing process. Water-based varnishes allow the reduction of the atmospheric emission of solvents and are characterized by the lack of scent, safeguarding the operator's and end-consumer's health.

TINTE | COLOUR SHADES

Le tinte di questo campionario colori possono subire, nel tempo, lievi alterazioni dovute all'azione della luce e dell'invecchiamento. Sono pertanto da ritenersi indicative.

The shades of this colour card may suffer slight variations due to light exposure and ageing. Therefore, consider them merely indicative.
