T

Dragon

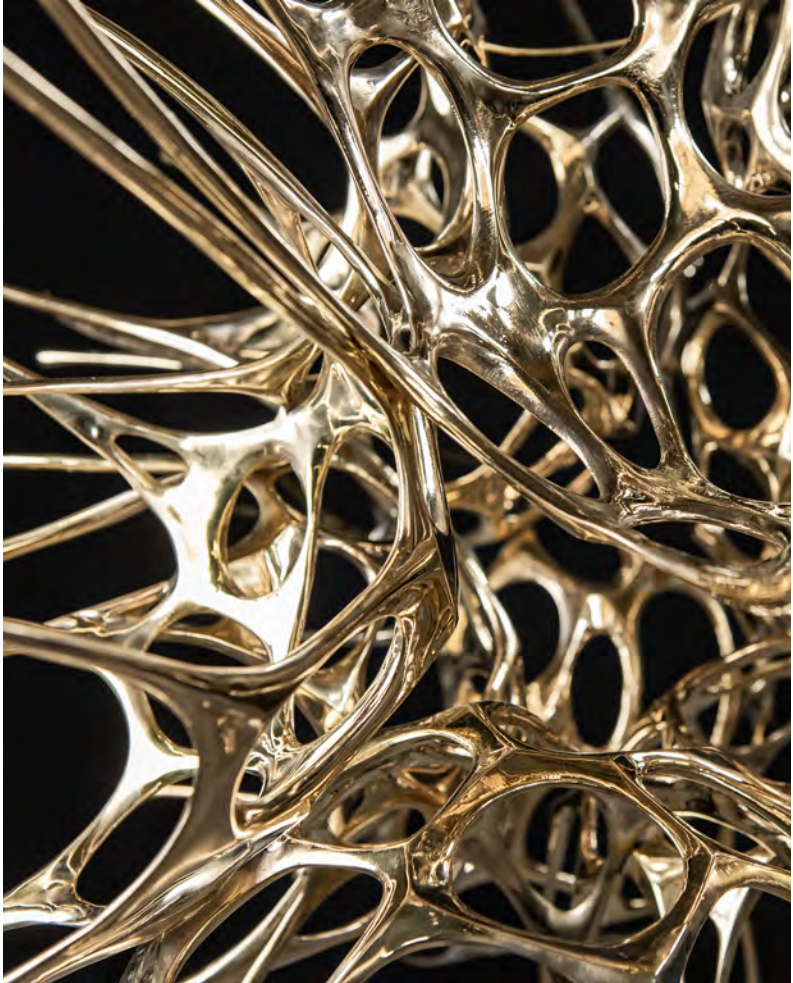

# Dragon, art's heartbeat.

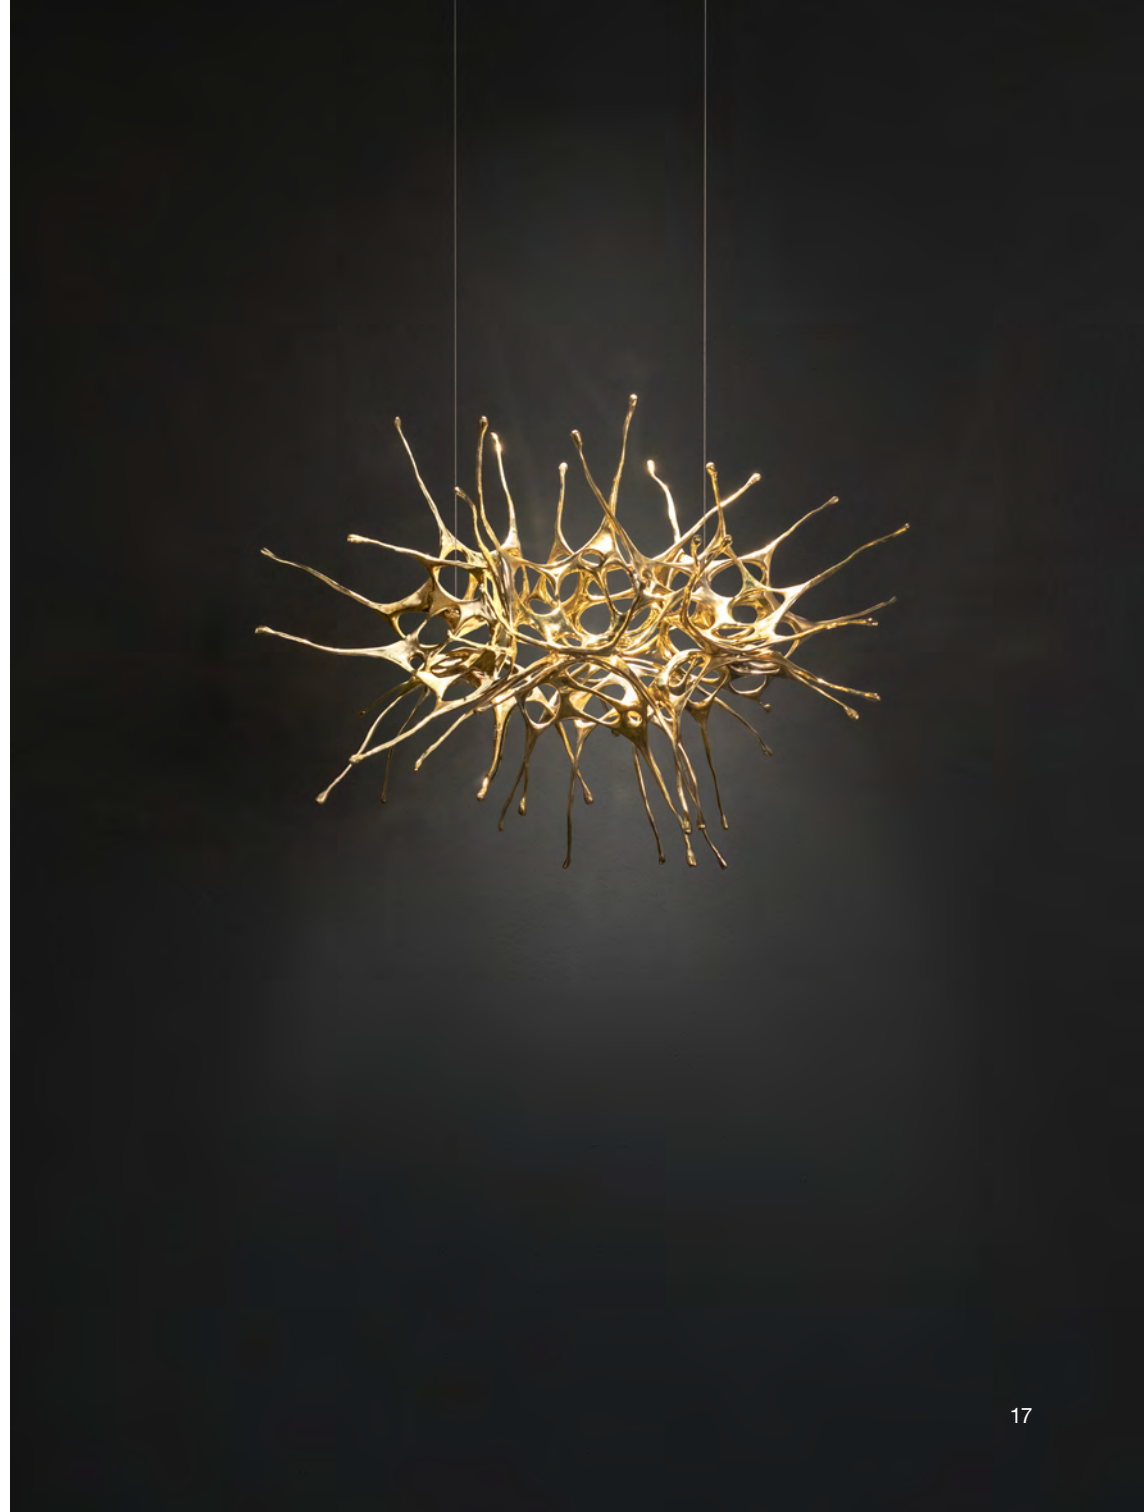

design Dodo Arslan

Dragon represents a new chapter for Terzani: the first piece designed as a standalone brass sculpture, cast at a historic foundry in Tuscany. At Terzani, our creative process benefits from the dialogue created between our history, our creative partners, and our innovative spirit. When creating Dragon, we found that the most powerful expression was not as a lighting design but as a sculptural work of art one that elevates the artist and harnesses our creative expertise. In Chinese mythology, the dragon is a nature deity central to creation tales. Thus, it makes sense that the latest from designer Dodo Arslan tapped into this powerful, ancient symbolism for his newest creation. In a dramatic rethinking of how rooms are experienced, Dragon is a sculpture designed to not only grab attention but also change how a space is considered. An explosion of liquid metal, tamed by Terzani's Tuscan master craftsman, Dragon reflects the power of the fires that shaped it and speaks to the connection between earth and water. This handcrafted piece embodies the cyclical dance of the elements while evoking a cosmic harmony. Its presence unites not only a space but those who inhabit it. Each Dragon is a unique, fully customizable, and numbered sculpture. While it imparts a feeling of a natural, organic form, it is a painstakingly crafted piece of art and an ode to the fusion between the creative force of man and nature. Design Dodo Arslan. Made in Italy.

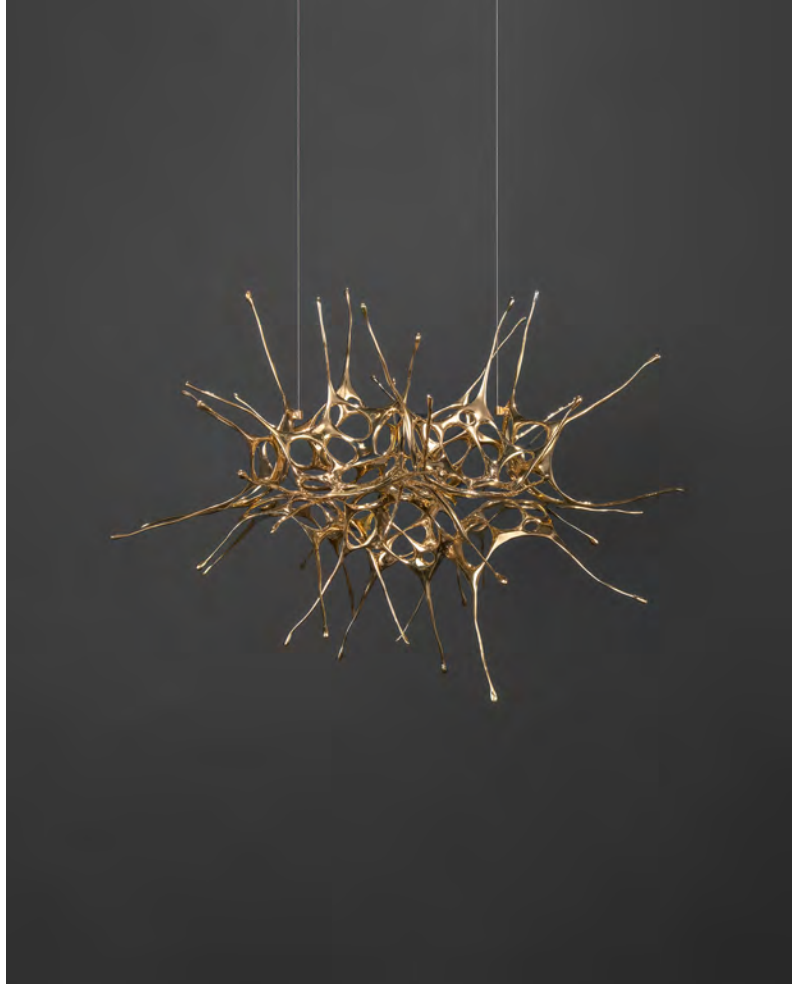

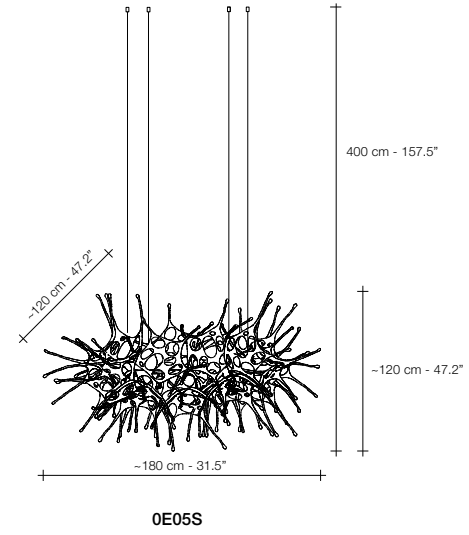

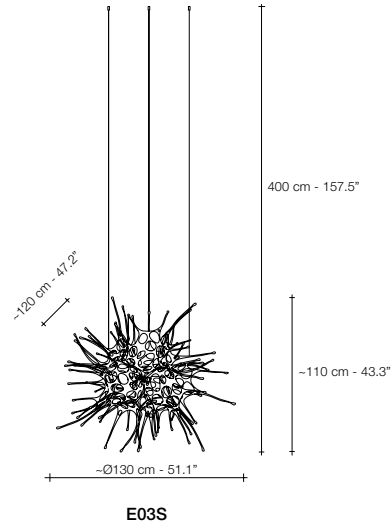

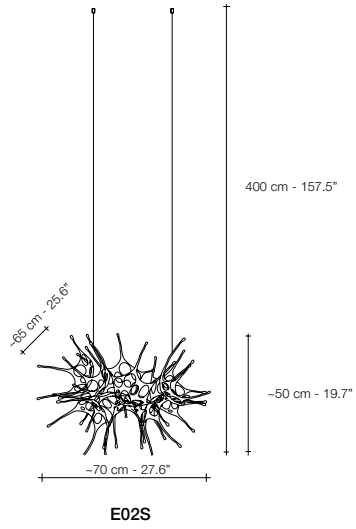

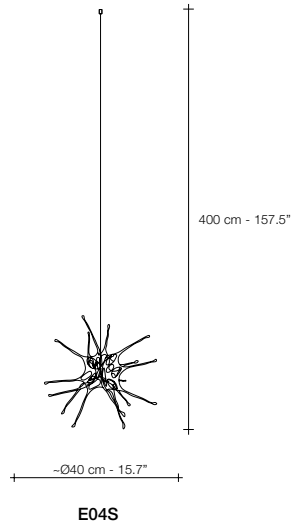

POLISHED BRASS

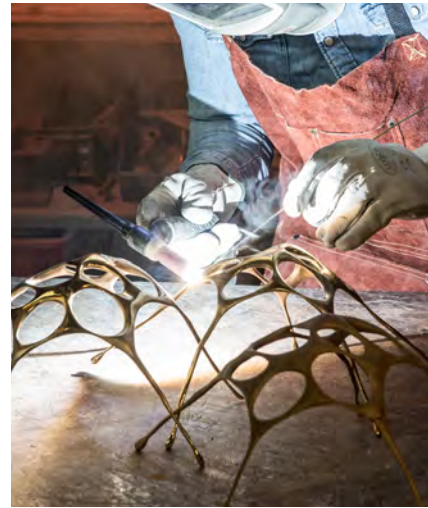

Dragon is designed as a standalone sculpture. You may choose to illuminate it with architectural lighting. Please refer to our spec sheet for suggested light source options or contact our team for more details.

# The making of

Each piece is a singular creation

The Dragon is a modular art form that lets you design and build your own unique sculpture. Each module fits seamlessly with others, offering endless possibilities for creative combinations. Start with a basic set and expand over time, mixing pieces to match your vision. Enjoy the freedom to adjust and reconfigure your sculpture, expressing your individuality through this versatile and engaging art form.

Creating a bronze sculpture using the lost-wax casting technique, or “cire perdue,” is a meticulous process that involves several stages. This ancient method, dating back thousands of years, allows for the creation of detailed and intricate works of art. The process begins with the artisan sculpting the original model out of wax.

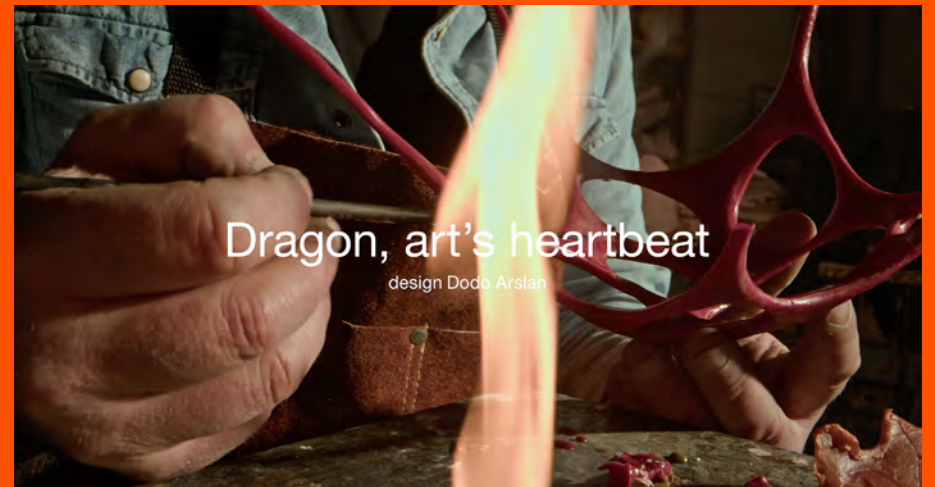

This wax model represents the final sculpture in every detail. Wax is chosen because it is malleable, allowing for fine detail work, and it has a low melting point. Each step, from creating the wax model to applying the final polish, requires skill and precision, making the finished bronze sculpture a true testament to the artisanal craftsmanship.

Bronze, an alloy typically composed of copper and tin, is melted in a furnace until it becomes a liquid at around 950°C (1742°F)

Create your own custom Dragon sculpture

The Dragon is a modular art form that lets you design and build your own unique sculpture. Each module fits seamlessly with others, offering endless possibilities for creative combinations. Start with a basic set and expand over time, mixing pieces to match your vision. Enjoy the freedom to adjust and reconfigure your sculpture, expressing your individuality through this versatile and engaging art form.

# Cleaning instruction

To ensure it maintains its luster over time, it's important to follow some simple maintenance practices. Regular Cleaning: Use a soft, dry cloth to remove surface dust and dirt. Avoid using abrasive cleaners or aggressive solvents that could damage the brass surface.

Periodic Polishing: To restore the brilliant shine of brass, use a non-abrasive brass polish. Apply the polish with a soft cloth, then gently rub following the direction of the brass grain.

Avoiding Aggressive Substances: Steer clear of contact with aggressive chemicals like ammonia, bleach, or acids, as they can irreparably damage the brass finish. By following these simple maintenance guidelines, you can enjoy the beauty and durability of your natural brass product for years to come. Thank you for your attention to caring for your purchase. For further questions or information, feel free to contact us. We're here to assist you.

All products in the Terzani collections are inspired by a return to noble artisan traditions. Every object is carefully created using craft techniques and for this reason certain details may vary from product to product. These variations are not imperfections but characteristic peculiarities of the production process. Terzani reserves the right to modify its products in order to improve its features.

Here some more info...

Dragon can be customized in many different ways because it is modular.

There are many versions available consisting of 4, 10, 11 or 23 modules welded together.

Each sculpture is numbered.

To illuminate the sculpture from the ceiling we can suggest an optional light source or you can source it yourself.

This is an exciting new piece of art and we have already had a lot of interest since we launched it.
